SUMMARY

A Focused and enthusiastic fresher with hands-on experience in front-end development using technologies like HTML, CSS, JavaScript, and React.js. Proficient in programming languages such as C, C++, and Python. Completed a frontend development internship at Zoho, where I built responsive user interfaces and reusable components. Certified in Python (GeeksforGeeks), SQL, and Agile Methodology.

EDUCATION

KINGSTON ENGINEERING COLLEGE

BE IN COMPUTER SCIENCE
2021-2025 | Vellore,TamilNadu
CGPA : 7.9 (till 7th semester)

THE NAMAKKAL TEACHERS VIDHYAASHRAM

HSC-2021
Vellore,TamilNadu
Score : 84.82

SEVENTH DAY ADVENTIST

SSLC-2019
Vellore,TamilNadu
Score : 78.00

SKILLS

PROGRAMMING LANGUAGES :

C, C++, Python

WEB DEVELOPMENT :

Html, CSS, JavaScript

DATABASE MANAGEMENT :

Sql

TOOLS KNOWN :

VS Code, Git, GitHub

CERTIFICATIONS

- Python Certification [Geeks For Geeks]
- Database and SQL Certificate
- Introduction to Agile Methodology

EXPERIENCE

ZOHO | FRONTEND DEVELOPER INTERN (ONSITE)

AUG 2024 - SEP 2024 | Chengalpattu, Tamil Nadu

- Developed and enhanced user interfaces using HTML, CSS, and JavaScript, ensuring a responsive and visually appealing experience across different devices and screen sizes. Focused on cross-browser compatibility and performance optimization.
- Built interactive front-end components and small-scale projects using React.js, implementing reusable UI elements and improving page load times.
- Collaborated with senior developers and UI/UX designers to understand best practices in web development, improve design consistency, and implement user-friendly features. Learned version control (Git/GitHub) and followed Agile development methodologies.

PROJECTS

BUS RESERVATION SYSTEM

- Designed a user-friendly interface with HTML and CSS, ensuring a smooth reservation experience with intuitive route selection, seat reservation, and clear booking status tracking.
- Developed a web application using Django (backend framework) and Python for scripting functionalities. This application allows users to seamlessly book bus tickets, manage routes, and track booking statuses.
- Demonstrated proficiency in full-stack web development, leveraging Django, Python, HTML, and CSS to build a comprehensive and user-centric bus reservation system.

ANDROID MALWARE DETECTION SYSTEM

- Developed a machine learning-based malware detection system for Android applications, utilizing CatBoost for high-accuracy classification. Implemented feature extraction using Androguard to analyze permissions, API calls, and intents.
- Integrated blockchain technology to store app metadata securely, ensuring data immutability and transparency. Used smart contracts to automate detection rules and enhance security.
- Designed and implemented a real-time threat detection system, preventing malicious apps from compromising user security. Focused on cost-effective and scalable solutions for Android cybersecurity.
